

# Voola - this is an ecosystem that it will become your lifestyle

## Voola App

A revolutionary financial application that combines innovative solutions. Our technologies changing the experience of working with assets: StableNFT, VoolaNotes, SmartCard and much more.

## Voola OS

The first independent operating system, with a new interface built entirely on gestures. Having got rid of the buttons, the user now gets the maximum content on the screen. Unlike the existing OS on the market, it does not transmit user data and does not have access to them.

## WeOla Messenger

Secure multi-purpose messenger and SuperApp offering free calls, chats, video conferences. All messages in chats, groups and WeOla channels are 100% encrypted with AES.

## SmartCards

Voola smart cards allow you to keep your crypto assets safe and easily accessible while keeping the secret keys contained in your card.

## Voolanotes

Our coupons provide the highest level of security from graphic design to manufacture, which makes them comparable to real banknotes. The printing process is carried out in accordance with strict security protocol and takes place in Dubai, under the jurisdiction of the UAE.
