

# Voola brief of concept

## Problem

Blockchain technologies are not used to their full potential, and speculative demand hinders the development. Projects still cannot create favorable ecosystems. Cryptocurrency is too volatile and unstable to be used in the mass market. Current projects are in high demand only in the shadows.

## Decision

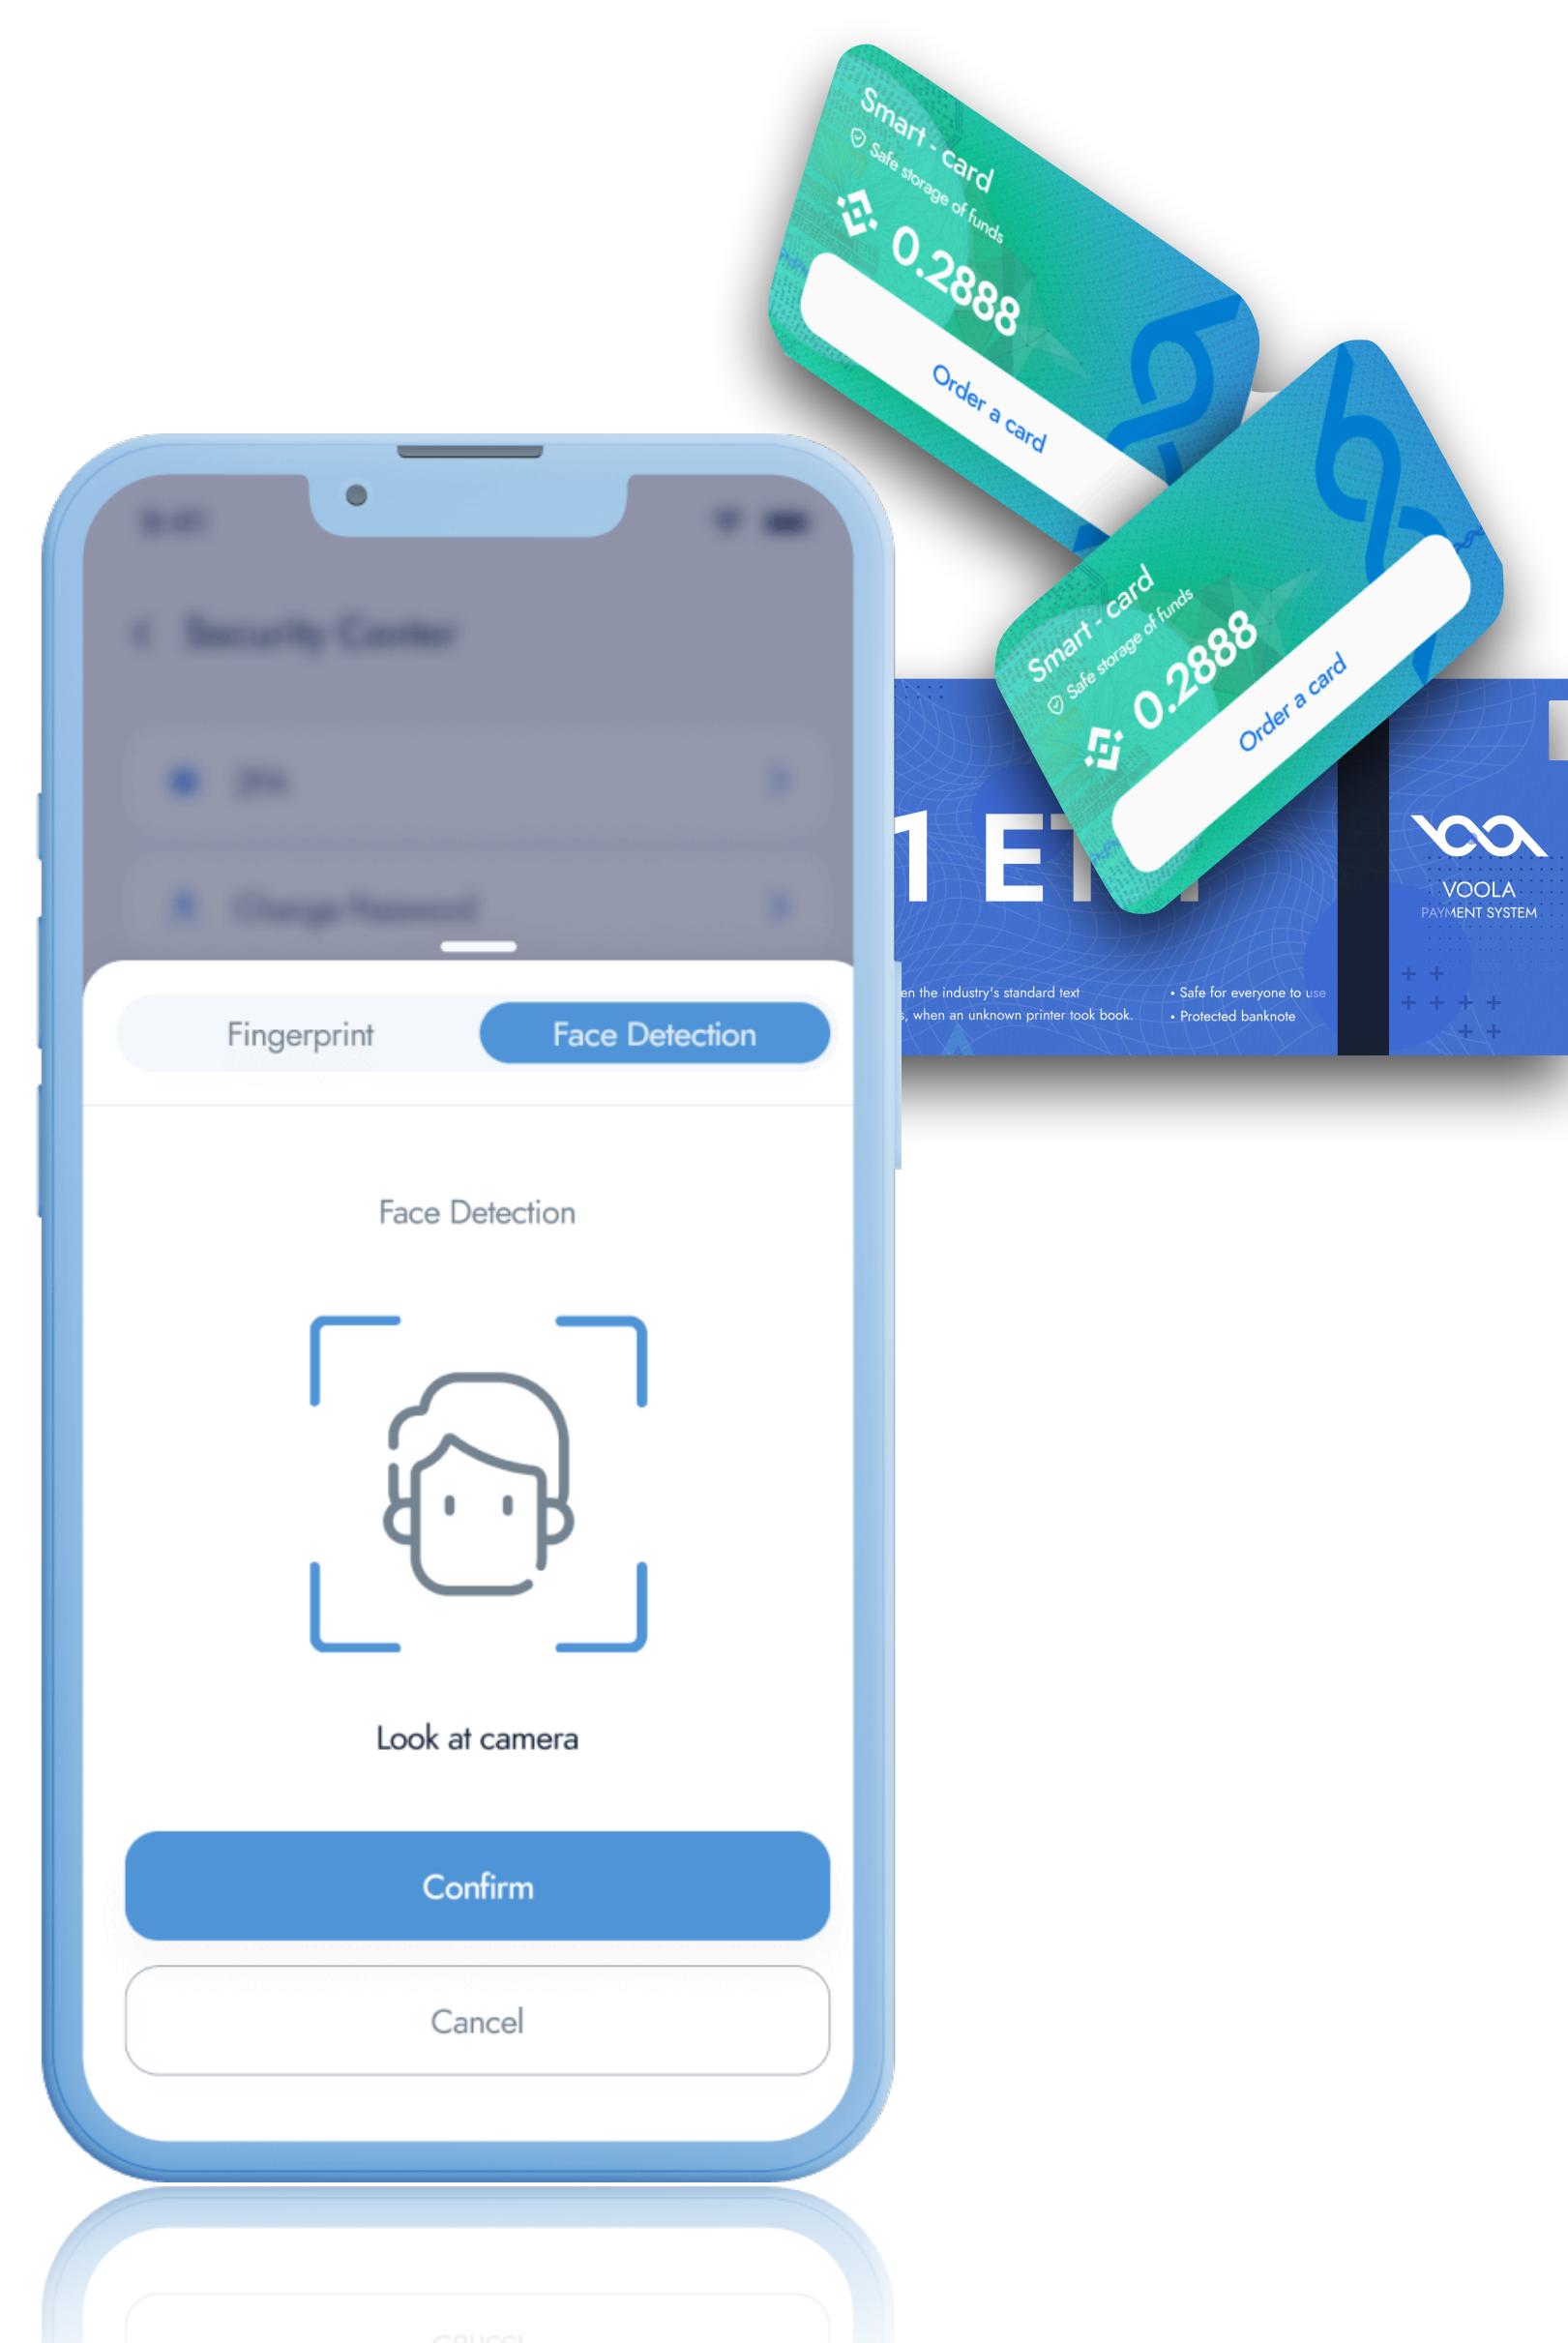

The project aims to bring blockchain into society and establish its own business model based on the principles of blockchain.  
StableNFT tokens for each business and audience for calculations and financial reporting.  
Acquiring functions and other services for business. A full-fledged crypto bank of the future.

## PRODUCT AND ECOSYSTEM

The Voola Wallet product is a full-fledged ecosystem based on a complex of smart contracts with fiat and cryptocurrency wallets, crypto coupons, stable NFT tokens and smart cards.

## MISSION

The product was created for international purposes of introducing cryptocurrencies, allowing developing various services based on smart contracts and connecting them to the main ecosystem. Business integrations being developed today will be able to join the main mission of turning cryptocurrencies into a mainstream movement.

## OUR INNOVATIONS:

### Smart Cards

Voola Smart Cards allow you to keep your crypto assets safe and easily accessible while keeping the secret keys contained in your card.

### Voolanotes

Our coupons provide the highest level of security from graphic design to manufacture, which makes them comparable to real banknotes. The printing process is carried out in accordance with strict security protocol and takes place in Dubai, under the jurisdiction of the UAE.

### StableNFT

Stable NFT tokens support and expand business opportunities and the use of cryptocurrencies. StableNFT tokens exist in the form of an ERC-721 digital token built on several blockchains.

| Round 1  | StableNFT  | IBAN and crypto cards                       | Blockchain   | Platform  | Business services  |
|--|--|---|--|---|--|
